

Routing

Here you can see three pages are created

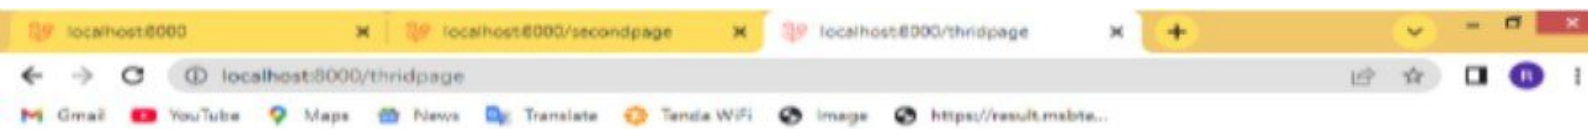

frist page

second page

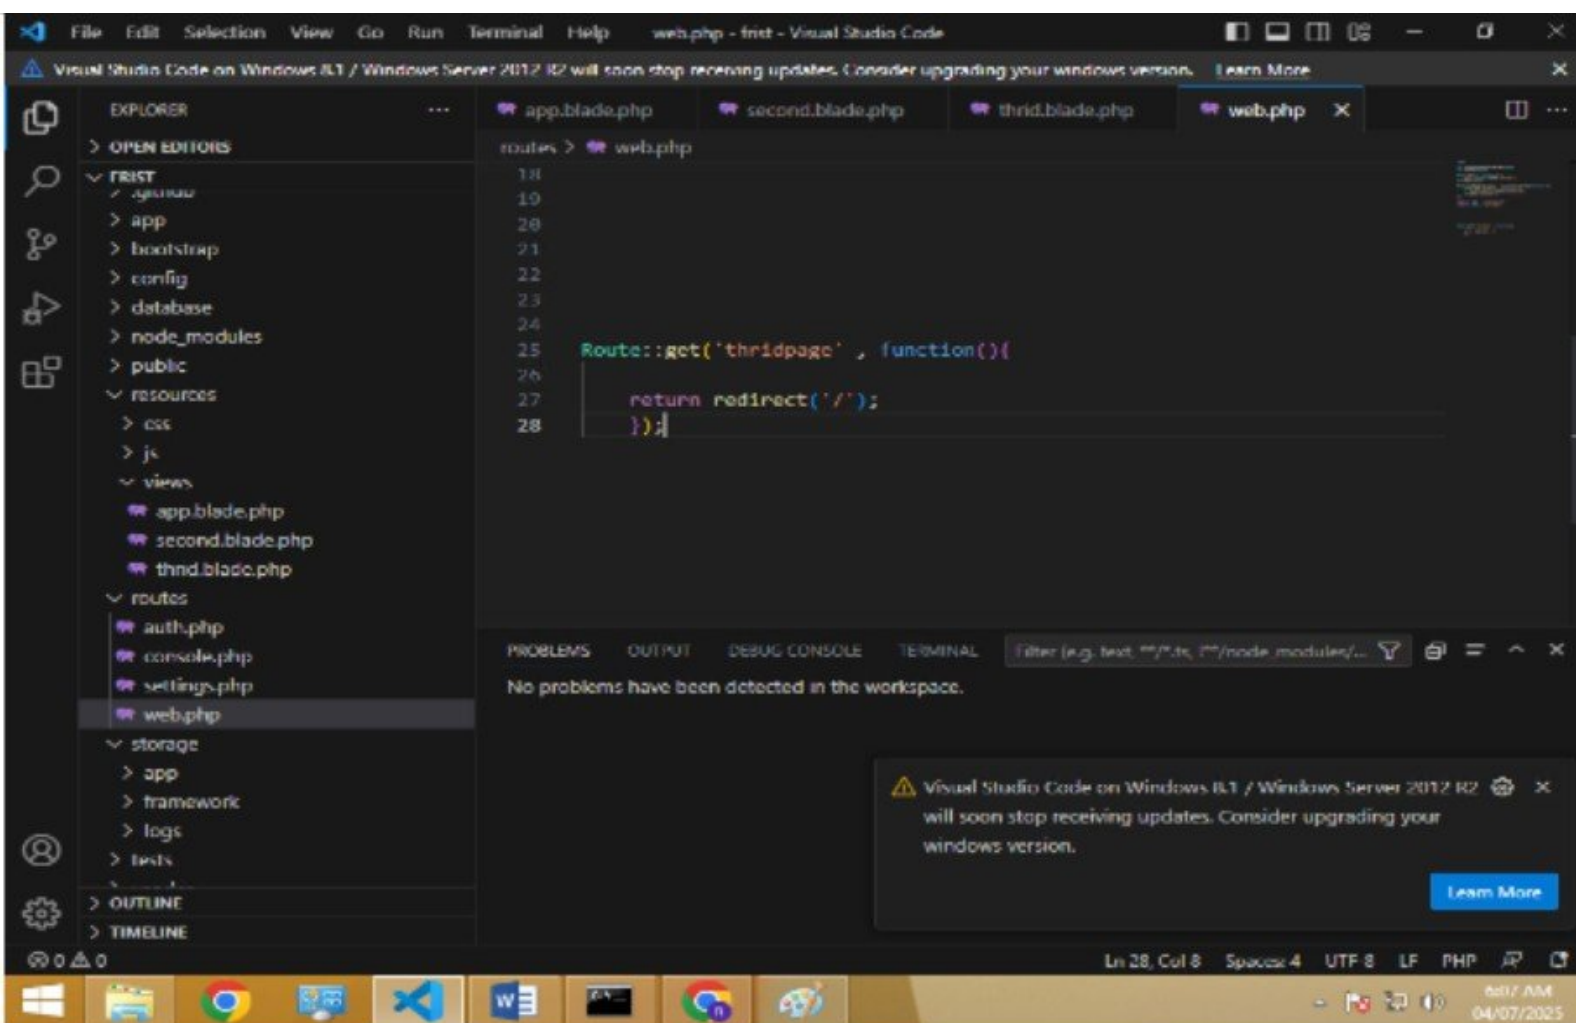

thrid page

Instead of going to the third page, we will go to the frist page using a redirect.when we will call the third page then it will be redirect the frist page.

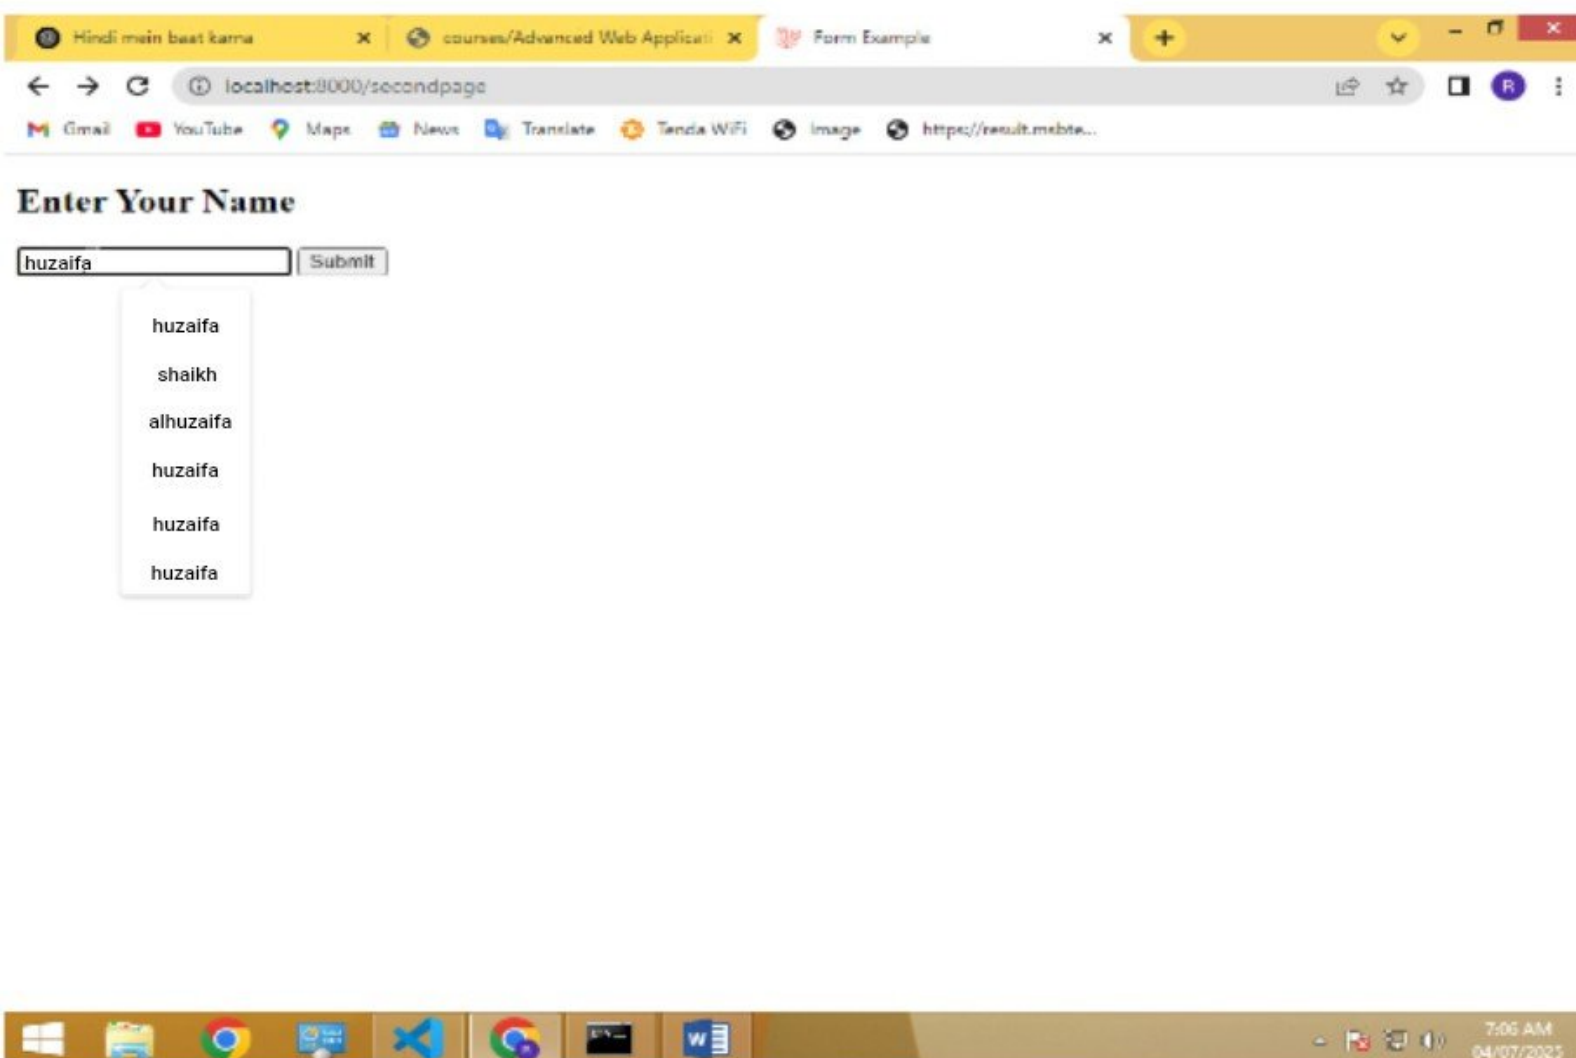

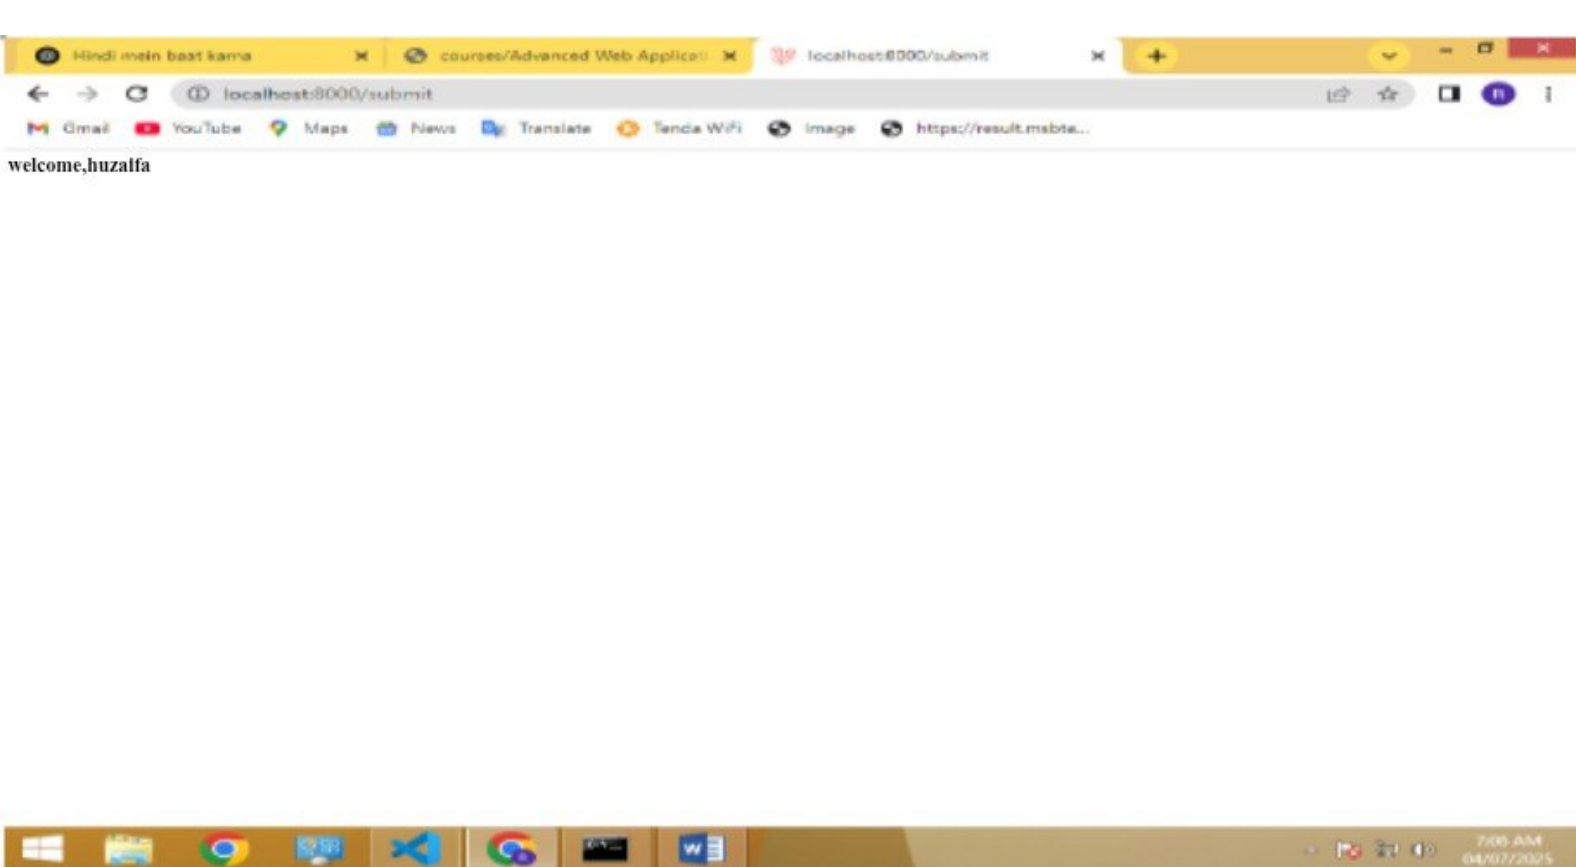

frist page

note

Post Method:

Web.php:

```
Route::post('/submit', function (Request $request) {  
    $name = Request::input('name');  
    return "Welcome," . $name;  
});
```

Second.php:

```
<!DOCTYPE html>  
<html>  
<head>  
    <title>Form Example</title>  
</head>  
<body>  
    <h2>Enter Your Name</h2>  
    <form action="/submit" method="POST">  
        @csrf  
        <input type="text" name="name" placeholder="Your Name">  
        <button type="submit">Submit</button>  
    </form>  
</body>  
</html>
```

3. Set up a Blade view file and pass data from the route to the view.

Web.php:

```
Route::get('thridpage', function(){
    $myname = "huzaifa shaikh";
    return view('thrid', ['myname'=>$myname]);
});
```

Thrid.php:

```
<h1>{{$myname}}</h1>
```

4. Use Blade syntax to display the passed data in the view.

huzaifa shaikh
